

5th Special International Training Course on **Wind Resource Assessment and Wind Farm Planning**

01st – 24th March 2023

Organized by

नीचे NIWE

NATIONAL INSTITUTE OF WIND ENERGY, CHENNAI
Ministry of New and Renewable Energy, Government of India

Sponsored by

MINISTRY OF EXTERNAL AFFAIRS, NEW DELHI
Government of India

Introduction

Renewable Energy in particular Wind and Solar has become mainstay in meeting energy needs having achieved grid parity in term of costs as well as technical requirement. The wind energy has proved a highly successful energy option with installation of over 894 GW worldwide by the end of the year 2021. It is estimated that viable wind power potential across globe is 72 TW, which is four times more than the current World's total energy demand. The major wind generator installation is in USA, some of the European countries and Asian countries like China and India and other countries catching up with the rest. Lack of skilled human resource has been one of the main barriers that hinders wind and other renewable energy integration.

The National Institute of Wind Energy (NIWE), under the Ministry of New and Renewable Energy, Government of India has pioneered in promoting wind Energy and has contributed for promotion of wind energy as one of the primary energy sources in India. Decades of concerted efforts have started to yield gratifying results and today, Wind power contributes 10.6% (41666.08 MW) of the total Indian energy mix of 408715 MW and stands fourth in terms of installed wind power capacity worldwide as on October 2022. Wind Resource Assessment is the first and foremost activity before the development of wind farm planning. NIWE has very good experience and expertise in Wind Resource Assessment activities and has established about 900 Wind Monitoring Stations all over the country and published Indian Wind Atlas. With this vast experience, we have an obligation to disseminate the knowledge learnt to foster growth of wind energy across globe. In this context, a four weeks International Training Course is scheduled by NIWE under ITEC programme sponsored by Ministry of External Affairs (MEA), Government of India. NIWE had so far trained more than 2950 professionals from 100 countries by conducting 53 national and 42 international training courses.

Objectives

- ◆ The prime objective is to transfer knowledge and special skills to the international participants on wind energy.
- ◆ To build skilled human resource so that there will be advancement of wind energy in the participating country.
- ◆ To provide an invaluable platform for exchange of professional and cultural experiences among diverse participants.
- ◆ To leverage the research that continues to shape this rapidly evolving discipline.

Training Methodology

- (a) Class room lectures including exercises and case studies to stimulate active participation and dialogue.
- (b) Practical classes at different Laboratories.
- (c) Hands-on working on Wind Resource Assessment equipments and software.
- (d) Study visits to operating Wind Monitoring Stations and wind farms to enhance effective transfer of knowledge.

The Programme

The course duration will be 24 days from **01st to 24th March 2023**.

Venue

The venue for the programme will be the **Conference Hall of National Institute of Wind Energy**, Chennai, India.

Course Syllabus

The course content for the training has been carefully thought out syllabus with specific subject experts giving lectures and going through specific case studies such that, at the end of the course considerable useful knowledge transfer is perceived.

The course will address the following aspects:

- ◆ Overview of Wind Energy Technology
- ◆ Introduction to Wind Resource Assessment
- ◆ Wind Resource Assessment techniques
- ◆ Site Selection for Wind Monitoring Stations (WMS), Installation, Instrumentation and Commissioning of WMS
- ◆ Met Mast and Modern Measurement Techniques including measurement using remote sensing instruments (SODAR & LiDAR)
- ◆ Data Analytics and Processing
- ◆ Software tools for Wind data Analysis
- ◆ Wind Resource Mapping & Atlas
- ◆ Design and Layout of wind farm
- ◆ Forecasting and Wind Energy Production

Participants will also have opportunity of hands on experience on Wind Resource Assessment equipments and software.

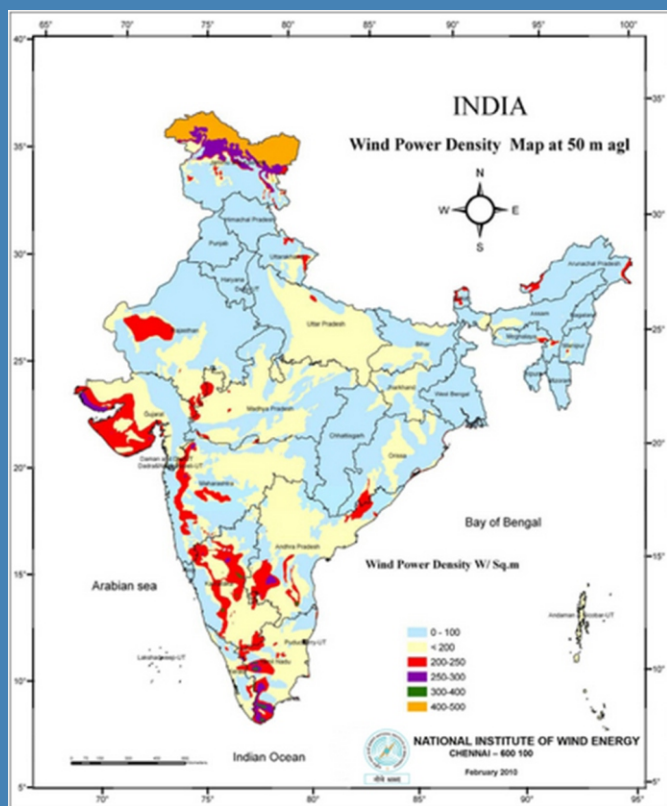

Target Participants

The course will be useful for anyone involved in wind energy or those who are looking for an introduction particularly Wind Resource Assessment. Persons from the following fields will find this course very relevant.

- ♦ Academic and R & D Institutions
- ♦ Power Industry
- ♦ Wind Turbine Manufacturers
- ♦ Suppliers and Distributors
- ♦ Utilities
- ♦ Consultants
- ♦ Project Developers
- ♦ Government Organization
- ♦ NGOs and Green Engineers

Eligibility

- ♦ Applicants should be from any one of the ITEC countries. List of ITEC countries can be found in www.itecgoi.in
- ♦ **Diploma or Degree** in any **Science or Engineering streams** with good knowledge in English.
- ♦ Age should be between **25 to 45 years**.

Resource Persons

The resource persons for this training course will be NIWE engineers, industry professionals, academicians and other national experts who have significantly contributed for wind energy development in the country.

Course Fee

There is **NO COURSE FEE** and is fully funded by Ministry of External Affairs (MEA), Government of India under ITEC programme. The funding includes **to and fro air fare, local travels, accommodation, living allowance and book allowance**. Accommodation provided will be of international standards.

Reason to Attend

The course will offer a good foundation on the principles of engineering behind wind energy technology and detailed about Wind Resource Assessment. The course would give a picture of complete know-how and pave the way to go about setting up financially viable wind farm projects. Participants after attending the programme will have the complete overview about wind and its technology as well as Indian wind power development, which will enlighten the participants to know about the wind sector, potential and job availability as well as the government schemes, policies and supports. This course will boost the participant's interest working towards wind energy sector and will create the required skilled / trained man power for fostering the growth of wind power sector.

How to Apply?

1. Those who are interested to apply for this Training Course are required to visit the website www.itecgoi.in.
2. Click on the E-ITEC/ITEC ONSITE, choose 'Apply Now' for filling up the online application form. It will take you to the streams to be chosen where you have to choose 'Environment and Climate Change' and then select 'National Institute of Wind Energy'.
3. It will take you to the institute page where you have to click on the 'apply' link provided in 5th Special International Training Course on Wind Resource Assessment and Wind Farm Planning and follow the instructions.
4. Link to apply : <https://bit.ly/3zlKira>

ABOUT NIWE

National Institute of Wind Energy formerly Centre for Wind Energy Technology shortly known as NIWE is an autonomous R&D institution established in 1998 at Chennai by the Ministry of New and Renewable Energy (MNRE), Government of India. It is a premier institution with highly experienced professionals having expertise in all related disciplines of wind energy sector. NIWE is a forward looking and practical institution always well placed to take the next logical steps towards advancing wind technology in the right direction. With its progressive approach to all wind energy related science and technology from onshore to offshore, NIWE assures assistance from resource assessment (both wind and solar, RE forecasting for Energy production) to project implementation. As an integral part of NIWE, a world class accredited services providing Wind Turbine Test Station (WTTS) is established at Kayathar, Tamil Nadu. Perhaps, NIWE is the only Testing and Certifying agency in the country.

NIWE has been vested with the responsibility to provide complete scientific and technical backing to all stakeholders in the field of wind energy and has stated its commitment through its quality policy.

QUALITY POLICY

NIWE is committed to achieve customer satisfaction, loyalty and confidence by providing credible, prompt and complete solutions of international quality to all the stakeholders in the wind energy sector.

NIWE, strives to be technical focal point of excellence for the present and future. NIWE shall stay at the forefront of Wind Turbine Technology application by continuously improving its expertise.
