

General conditions of NOC for construction of Wind Power Projects:-

- (i) All tall structures be either red or white in colour or chequered in red & white or red & yellow. All structures (permanent or temporary) higher than 50 feet will have an obstruction light at the highest point, which shall be kept serviceable at all times. There will be no wire /cables connecting any structure which is higher than 50 feet. No new structure to be erected without obtaining permission from MoD. In case any structure interferes with helicopter flying operations on a future date, the developer will be liable to remove the structure(s), if required.
- (ii) Foreign Nationals from inimical countries and firms/ persons with dubious antecedents should not be employed or allowed to visit the affected areas even in consultative roles. If such foreign nationals are required to be employed, then these must be thoroughly screened for their credentials and clearance of MHA (IB) must be obtained prior to their employment/ visit.
- (iii) Verification and clearance of all the employees at the proposed project sites in civil areas need to be carried out in consultation with civil police/ agencies and a copy be submitted to Local Military Authorities before commencement of the project.
- (iv) Photography of Military or sensitive installation and interactions with service personnel deployed is not permitted.
- (v) The move/ presence of the representative of the company near any sensitive area should be informed and coordinated with local police in concurrence with the nearest Army/ defence post/ unit to ensure synergized and adequate security measures.
- (vi) Any infrastructure in the form of WTGs/ Solar Power Projects etc. should enable its use for defence purpose. This include power sources, shelter, and ability to mount surveillance devices for enhancement of defence architecture.
